```

Next Steps

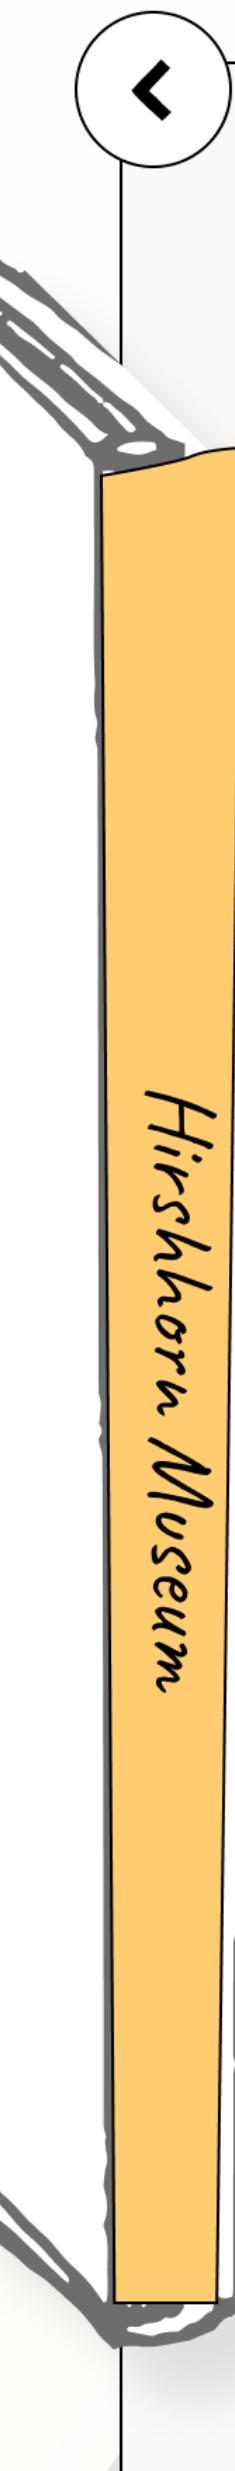

1. Determine which museums to include.
2. Figure out how to navigate 1000 API fetch limit.
3. Explore 3D scatterplot feasibility.
4. Normalize sizing data across titles, museums.
5. Determine comparison objects and points of interest (e.g. Eiffel Tower).
6. Leverage AI image generators to get sketches of objects and POIs.
7. Vectorize sketches.

Josh

SMITHSONIAN

The world's largest museum collection is **even bigger** than you think.

ABOUT

This is some information about the Hirshhorn museum. It provides readers with information about the museum's collection.

HIGHLIGHTS

In this paragraph, we highlight specific pieces that, when clicked, will find their corresponding data point on the chart. Like [this one](#) or [this one](#). The particularly big ones, you know?

COLLECTION SIZE

In this paragraph, we note the overall size of the collection and talk about different things it's larger a la home page, only thematic. So in this case, cover every building in as a gorgeous mural!

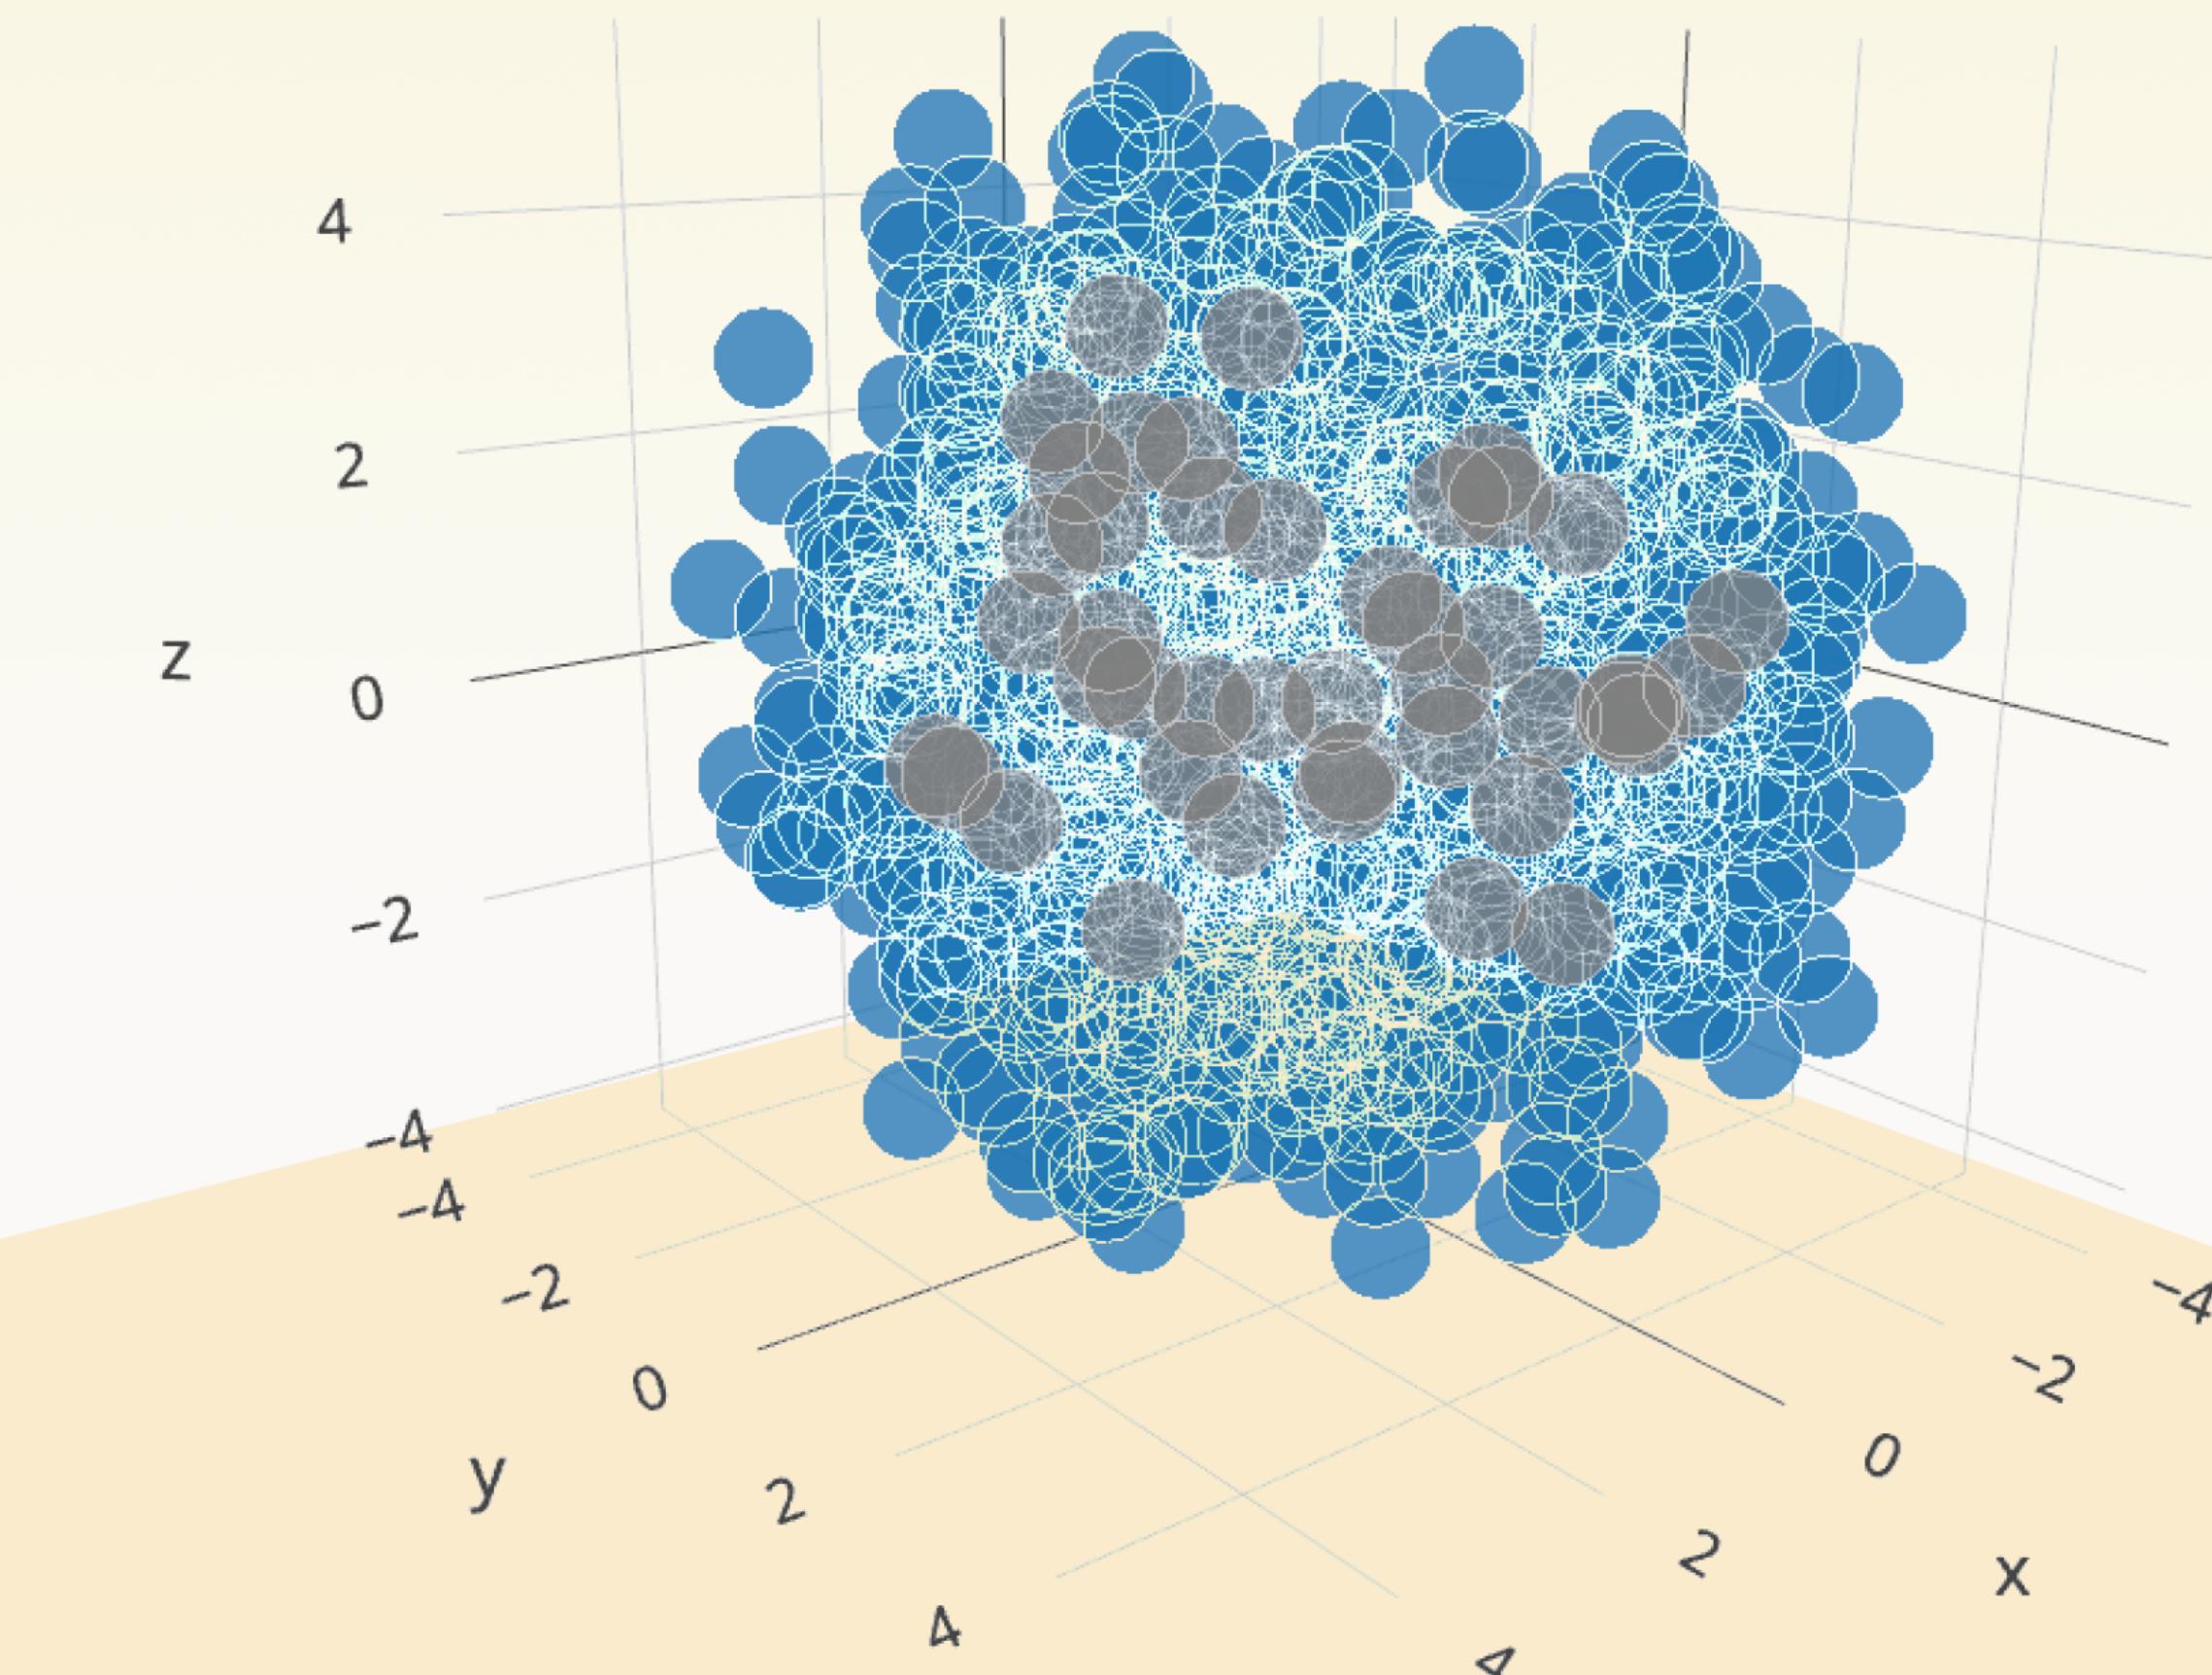

The collection's biggest!
